EnvirosEal las-320™ is an environmentally safe asphalt sealer/preservative that can be quickly and easily applied to increase the life of your asphalt by over 50%. It helps guard against damage from oil and gasoline spills and repels most liquids including acids. This prevents water seepage which causes base breakdown and potholes. It also protects against fading from UV damage.

- Prevents UV damage
- Prevents oil and gasoline spill / leak damage
- Repels most other liquids including acids
- Prevents water seepage causing base breakdown and potholes
- Prevents potholes caused by trapped water freezing
- Ice and snow will not stick to the asphalt in winter climates
- Increases asphalt life by at least 50%
- Non-Toxic, Non-Hazardous, Non-Flammable, Environmentally-Safe
- Contains no petroleum distillates
- Meets or exceeds all EPA, ASTM, FAA and U.S. Military regulations
- Field tested and proven
- Used and approved by the U.S. Air Force for tarmacs, runways, aprons, shopping centers, truck stops, gas stations, car lots, parking lots, fuel storage, containment dikes and heavy equipment yards
- Very cost effective
- Easy to install
- No smell and will not track into buildings at any temperature after curing
- Dries in 20 to 40 minutes, can be striped in 45 minutes and driven on within two hours
- LAS-320 is available in a 55 gallon drum and a 264 gallon tote and usually ships same day.

100% Guaranteed for (3) three years
Deep holes must be filled with asphalt patching material before applying Enviroseal LAS-320™.

ENVIROSEAL LAS-320™

**POLYMERIC LIQUID ASPHALT SEALER/PROTECTORANT**

ENVIROSEAL LAS-320™ asphalt sealer/preservative is not a petroleum based product. It is a polymeric liquid that forms a molecular bond with the oxidized asphalt surface and penetrates distressed areas, such as cracks and raveled areas.

UV rays and water are the two primary reasons for asphalt failure. **ENVIROSEAL LAS-320™** renders the surface impervious to water and most common chemicals, including petroleum products and acids. **Powerful**

UV blockers are added to increase the longevity of your asphalt. It works equally well with new or existing asphalt.

This high quality black asphalt sealer is EPA approved with very low VOC’s (Volatile Organic Content), less than 89 grams per liter. **ENVIROSEAL LAS-320™** was developed for today’s ecological/green building needs.

**ENVIROSEAL LAS-320™** was put through exhaustive weathering tests including successful freeze-thaw tests by McGuire AFB in New Jersey.

**ENVIROSEAL LAS-320™** was developed for use on asphalt pavement surfaces, including airport aprons, fuel storage areas, parking lots and private driveways. The added benefit of a low VOC means “no smell”, so it’s also perfect for any public parking area like hospitals, shopping centers and schools.

In 2000 at Vicksburg, MS, an **ENVIROSEAL LAS-320™** material test section was placed at ERDC to evaluate the claim that it was fuel resistant as part of the U.S. Air Force Study on “Rejuvenators, Rejuvenator/Sealers and Seal Coats for Airfield Pavements”.

The **ENVIROSEAL LAS-320™** material test section passed the PCTC fuel-resistance test with flying colors.

We have proven through these test applications that we can offer an incredibly strong and environmentally-friendly asphalt sealer/preservative.

Interviews were conducted with **ENVIROSEAL LAS-320™** distributors in the States of New York, California and Texas where coal-tar sealers have been banned. The distributors expressed complete satisfaction with the use of **ENVIROSEAL LAS-320™** in lieu of the coal-tar sealers.

**ENVIROSEAL LAS-320™** was developed for today’s ecological/green building needs.

**ENVIROSEAL LAS-320™** is easy to use, never needs any mixing and cleans up with just water. It can be brushed sprayed or rolled on and has a coverage rate of up to 80 to 100 sqft per gallon, depending on the condition of surface. Broom application is up to 110 ft per gallon, 2.75 m² per liter. **ENVIROSEAL LAS-320™** dries in 20 to 40 minutes, can be striped within 45 minutes and driven on in two hours!

**ENVIROSEAL LAS-320™** is available in 55 gallon drums, 264 gallon totes, or 5 gallon pails and usually ships same day. No minimum order.
